Zidan Adhitiya

Data Scientist & ML Engineer

About Me

I am a final-year student majoring in Network Information Systems and Applications (SIJA) at SMK Bina Putera Nusantara, with a strong interest in data science and machine learning for structured, real world data.
I have hands on experience working with data pipelines, covering data extraction, cleaning, feature engineering, and model development using Python. My focus is on building practical and reproducible solutions that can support data-driven decisions.
In addition to technical skills, I have a solid foundation in business fundamentals and financial data, which helps me understand problems beyond the technical side and align analytical work with real business needs.

Experience

Healthcare AI

Called Kerly AI, its basically an AI-powered healthcare application that provides medical assistance and supports multiple medical check up services through a single platform.

I worked on the AI component, focusing on NLP model tuning using Google Cloud Vertex AI, with support from Binah AI for healthcare-related functionalities. This project gave me hands-on experience deploying AI models within a real application environment.

All My Project

I currently have various projects, such as a Healthcare AI, Middle man blockchain based platform for a newbie in Base ecosystem, Trading Community, etc.

Education

Vocational High School
Bina Putera Nusantara Vocational High School
2022 - 2026

Junior High School
Nashrul Haq Al Islamy Junior High School
2020 - 2022

Skill Set

Data Science
Python - Pandas - Ms Excel

Ms Office
Excel specialist, also skilled Word & PowerPoint.

Web Scraping
Python - BeautifulSoup - Selenium

ML Engineer
Python - Pytorch - TensorFlow - Numpy - Pandas
